

## Food Code Numbers and the Food Coding Scheme

The Foods We Eat online search tool is based on the Food and Nutrient Database for Dietary Studies (FNDDS).

In FNDDS, the primary (usually generic) description of a given food is assigned a unique 8-digit food code. The food code is assigned according to a scheme that associates the first three or four digits of the code number with specific food groups and subgroups. The first digit in the food code identifies one of nine major food groups:

- (1) milk and milk products
- (2) meat, poultry, fish, and mixtures
- (3) eggs
- (4) legumes, nuts, and seeds
- (5) grain products
- (6) fruits
- (7) vegetables
- (8) fats, oils, and salad dressings
- (9) sugars, sweets, and beverages

The second, third, and (sometimes) fourth digits of a food code identify increasingly more specific subgroups within the nine major food groups. The remaining digits are used to identify particular foods within a numerical sequence. Shown below is an example of a food item and how the first three digits signify which groups the food item belongs to:

55103000 Pancakes, with fruit

- The first digit (5) means this food item is in the **Grain Products** section.
- The first two digits (55) mean this item is in the **Pancakes, Waffles, French Toast, Other Grain Products** section.
- The first three digits (551) mean this food item is in the **Pancake** section.

The complete Food Coding Scheme begins on the next page.
